

Prevent Water Pollution

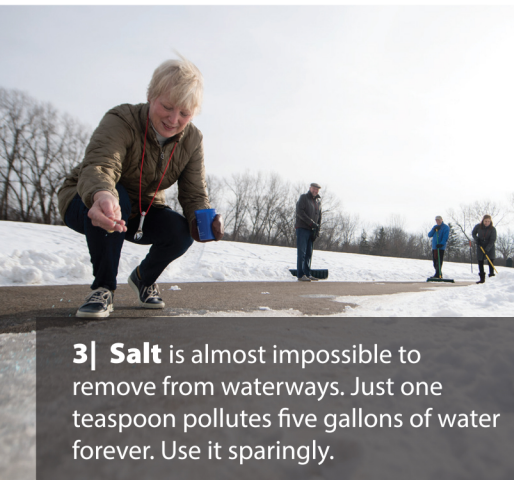

Rain and melting snow wash anything that's on streets and other paved surfaces down storm drains and into lakes, rivers, and wetlands.

1| Leaves, grass, and dirt contain phosphorus, which feeds the algae that turn lakes green. Keep them off streets and sidewalks.

2| Trash clogs drains and pipes causing flooding. Put it in the garbage.

3| Salt is almost impossible to remove from waterways. Just one teaspoon pollutes five gallons of water forever. Use it sparingly.

4| Dog poop carries harmful bacteria, parasites, and phosphorus. Pick up after your pet!

Sweep up! Rake up! Pick up!
