VI. **Business**

A. **Goose Lake**

i. **Stakeholder meeting (7/16) summary**

Voss discussed the results of the July 16<sup>th</sup> Goose Lake stakeholder meeting that went over different management and project options for the Lakes.

ii. **Alum treatment for East Goose Lake**

Direction was sought by staff from the Board at the June meeting to pursue Clean Water Funds grant funding and preparation for submittal of an application for 2019, depending upon the results of the July stakeholder meeting. **After the stakeholders agreeing to support pursuing the grant, staff is asking for Board approval and action to submit the grant application for 2019 funding and implementation of Alum treatment on East Goose Lake.**

**Discussion:** Jones stated he would like to see the City of WBL be asked to contribute at least half of match fund amount, as well as other entities for contributions, and asked for an informal motion on this stipulation.

A motion was made by Jones and seconded by Prudhon for other partner agencies be asked for contributions to the East Goose Alum treatment grant fund match, if awarded. Vote: all aye, motion passed.

A motion was made by Prudhon and seconded by Jones to allow staff to submit an application for 2019 Clean Water Fund grant funding for the implementation of alum treatment on East Goose Lake. Vote: all aye. Motion passed.

**iii. Goose Lake subwatershed modeling and BMP**

At the June meeting McNamara presented a proposal to use WBF grants to fund a subwatershed study of Goose Lakes, project design and implementation of one project. The grant application for this was approved in July by BWSR for the funding of \$59,651. Staff has also received an official proposal from Barr Engineering for the subwatershed Hydraulic & Hydrologic modeling, design & engineering of 3 projects, including Oak Knoll Pond, to 60% completion, and implementation of 1 project. **There are two recommendations: 1.) that the Board considers authorizing the Board Chair to sign the approved grant agreement with BWSR when it comes in, and 2.) the Board approves the August 3, 2018 Barr proposal for Subwatershed Feasibility & Implementation for a total cost of \$53,000.**

A motion was made by Lindner and seconded by Prudhon to authorize the Board Chair to sign the approved grant agreement with BWSR for the Goose Lake Subwatershed Feasibility & BMP Implementation Project. Vote: all aye. Motion passed.

A motion was made by Long and seconded by Lindner to approve and sign the Barr Engineering Goose Lake Subwatershed Feasibility & Implementation proposal, with a total cost not to exceed \$53,000. If more funds are needed, that amount will be brought back to the Board for consideration. Vote: all aye. Motion passed.

**B. Storm Sewer Utility Rates – Res. 05-2018**

Due to the passage of the 2019 Budget at the June Board meeting, the storm sewer utility rates are an increase of 10.48% above 2018 rates. This increase put more money into the Lambert Creek project implementation for possible ditch repair and improvement projects. Also, this number reflects a budget that is sustained by the SSU, not by continuing to draw down VLAWMO's reserves.

**Staff is recommending approval of resolution 05-2018 setting the 2019 Storm Sewer Utility Rates.**

A motion was made by Lindner and seconded by Long to approve Resolution 05-2018, setting the 2019 Storm Sewer Utility Rates. Vote: all aye. Motion passed.

**C. Lino Lake Local Water Plan Consideration – Res. 06-2018**

Staff received and reviewed Lino Lake's Local Water Management Plan (LLWMP) for consistency and content with VLAWMO's own Plan and rules. Minor comments were submitted to City Staff and consultants, and they have provided written agreement that the requested changes will be made pending further comments from Rice Creek Watershed District and Metropolitan Council.

**Staff is recommending approval of the Lino Lakes Local Water Management Plan, resolution 06-2018, conditional upon receipt of a final plan including the requested updates.**

**Discussion:** Jones clarified that these are just small changes technical changes, nothing glaring, for both LWP draft considerations.

A motion was made by Lindner and seconded by Prudhon to approve the Lino Lakes Local Water Management Plan, resolution 06-2018, conditional upon receipt of a final plan that includes the requested updates. Vote: all aye. Motion passed.

**D. White Bear Township Local Water Plan Consideration – Res. 07-2018**

Staff received and reviewed White Bear Township’s Surface Water Management Plan (WBTLWMP) for consistency and content with VLAWMO’s own Plan and rules. VLAWMO staff also had minor comments were submitted to the Township’s staff and consultants, and they have provided written agreement that the requested changes will be made pending further comments from Rice Creek Watershed District and Metropolitan Council. **Staff is recommending approval of the White Bear Township Local Surface Water Management Plan, resolution 07-2018, conditional upon receipt of a final plan including the requested updates.**

A motion was made by Lindner and seconded by Jones to approve the White Bear Township Local Surface Water Management Plan, resolution 07-2018, conditional upon receipt of a final plan that includes the requested updates. Vote: all aye. Motion passed.

**E. Cost Share Program – Landscape Level 2 Grant Application**

Staff has received its first application this year for a Landscape Level 2 Cost Share grant. The grant application is for a 20,000 sq ft native plant restoration at a townhome association in Vadnais Heights. The Association, Windsong HOA, has chosen a reputable contractor, and will opt to pay for a 3 year maintenance plan, that is **not** covered by LL2 grant funds, to ensure proper establishment and long project life. **The WHOA is requesting \$7,770 in LL2 grant funding for this project; the TEC passed action to recommend the project grant application LL2 2018-01 for approval and funding of \$7,770, and staff is recommending the same.**

**Discussion:** Lindner asked about a maintenance period for the grant, and Thompson confirmed there is a 5 year maintenance period, as stipulated in the grant agreement. Long asked how visible the project is. Thompson responded that it is not right on a main road and that it is within a neighborhood. McNamara mentioned that Voss focuses on projects like this and spotlights them for Education & Outreach efforts beyond what is seen.

A motion was made by Lindner and seconded by Prudhon to approve the Windsong Homeowner Association grant application LL2 2018-01 for \$7,770 from Cost Share Program funds. Vote: all aye. Motion passed.

**VII. Discussion**

**VIII. Administration Communication**

McNamara mentioned the new position has been posted for two weeks and is considering extending the posting depending on how many more applications come in by the posting end date.

**XI. Adjourn**

A motion was made by Lindner and seconded by Jones to adjourn at 8:40 pm. Vote: all aye. Motion passed.

Minutes compiled and submitted by Tyler Thompson.

Re: IV. A. New staff: Dawn Tanner

Please help me welcome Dawn Tanner as our new Program Development Coordinator. She comes to us from the University of MN where she is an adjunct professor. She has developed and taught a water quality class focused at the watershed scale, and developed new fisheries, wildlife and conservation biology field classes. Dawn also developed an online preparation class for the field session. Among her array of skills, we are also intrigued by the possibility of more partnerships with the U of M.

Dawn has experience in all aspects of grant work, saying she enjoys writing proposals and generating funds. Her strengths focus around communication, specifically partnership development with multiple stakeholders, technology use, proposal writing, project implementation, and grant administration.

Ask her about some of her more global outreach and research experience sometime. This includes a Climate Change Rally and Teach in at the State Capital, work on the coral reefs, the Galapagos islands and a large research and education project in Borneo.

Already providing value to the watershed in many ways, Dawn has a MN Conservation Corps grant application for Board consideration at this meeting. The staff is very excited to have her join us.

Re: **IV. B. Lambert Creek (Co. Ditch 14) Attorney Direction**

**1.) Discussion of ACSIC for Co. Ditch 14 (ACTION)**

Troy Gilchrist, VLAWMO attorney, will be present to discuss with the Board how to proceed with management of Ditch 14 & Branches under watershed law (103B) and how the As Constructed and Subsequently Improved Condition (ACSIC) and the rest of the technical report from Houston Engineering may be used. There will be an opportunity to ask questions. It appears we can follow our standard process for identifying needs and capital projects. This includes moving forward with dredging maintenance on Lambert creek. VLAWMO staff has also sought direction from oversight agencies, DNR & BWSR, on how the permitting process could differ if the Ditches alignments are. Will the technical memo be sufficient to meet their permitting requirements?

**Staff is recommending the Board wait to decide to hold a public hearing after being informed by VLAWMO's attorney and guidance from oversight agency reps.**

**2.) Discussion of Repair Recommendation**

Houston Engineering explored 2 repair options: 1.) ditch cleaning (dredging) and 2.) ditch cleaning and upsizing Edgerton St & the Eastern Koehler Rd culverts. Option 1 would dredge 4,300 LF of Lambert Creek from just upstream of Pennington through most of the Koehler creek bend area. In some areas this would remove 1 – 2 feet of sediment. This work would decrease the depth, duration and extent of the nuisance flooding in the Pennington area, and has an estimated cost of \$105,000 per engineers report.

BOD directed staff to meet with both the engineers and a contractor on site to get a better estimate on the dredging costs. Staff, along with the engineers and contractor, met on site 10/4/18.

Site access, side-casting vs hauling out sediment and tree removal was discussed. Attached is the new rough estimate of dredging work for the 4300 LF of Lambert Creek after site recon with engineers and contractor. \$123,024.02 is the estimate from the engineer. This does not include engineering costs, legal & admin and contingency.

Engineering is estimated at \$35,000. This would include bidding, meetings, construction management and inspection.

Legal & Administration is estimated at \$12,000

15% contingency on bid would be \$18,500

**Total estimated cost of \$188,524. Expect 2% (\$3,770) annual increase.**

**Staff is requesting that the Board develop direction on how to proceed with alternative 1, sediment removal from the reach of Lambert creek identified in the repair memo.**

### **3.) Information regarding Lambert Lake maintenance**

Staff has identified one other area of Lambert creek in need of maintenance with brief mention in the Houston memo, the pond in Lambert Lake. This best management practice was installed in 2004-2005 with a Clean Water fund grant in partnership with the St. Paul Regional Water Service (SPRWS). A pond was excavated in Lambert Lake (wetland) with sheet pile sides on the south and northwest. The final side of the triangular pond on the east is earthen. Lambert creek runs through this pond. The sheet pile weir on the southern (downstream) side has multiple small adjustable notches designed to change the channelized flow of the creek to sheet flow across the large wetland area.

Objectives were several for this project. Relieve flood along Stockdale Rd and Co. Rd. F by routing water away from those properties. Increase the amount of time water spent in Lambert lake by pooling it in the pond and encouraging sheet flow across the wetland. This would increase infiltration into the groundwater, allow nutrient settling, encourage plant uptake of nutrients, evaporation, and decrease the velocity and volume of water downstream of the system. Buffering the flow was also intended to help with erosion issues downstream along some of the area identified for further maintenance.

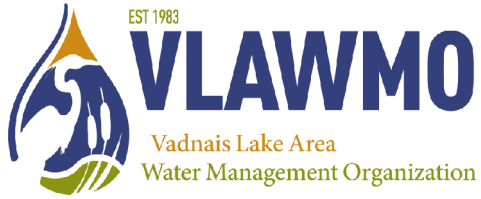

The pond has been working to provide these benefits. However, it is filling up. The original design was for a 5-6 foot depth. Attached is the bottom survey of the pond showing the capacity is significantly reduced. Staff is suggesting an estimate for dredging the pond be requested of the same contractor as provided the creek maintenance dredging for planning purposes.

The other concern is the short-circuiting of the sheet flow after it leaves the pond. Water is not sheet flowing through the wetland but taking a right turn and flowing west along the south side of the sheetpile to where it rejoins the overflow channel and continues downstream. There is very tall vegetation, Phragmites, growing in this area of the wetland. Phragmites comes in native and an invasive exotic variety. The invasive version can grow to be 10 – 12 feet tall. It can form a fairly solid wall of vegetation. Thanks to the connections of our new staff, we have scheduled a field visit to Lambert Lake with a Phragmites expert from the U of M this fall. We hope to confirm what type of grass this is and see if there are management options we could consider. All of this could be part of the Plan amendment.

**Recommendation:**

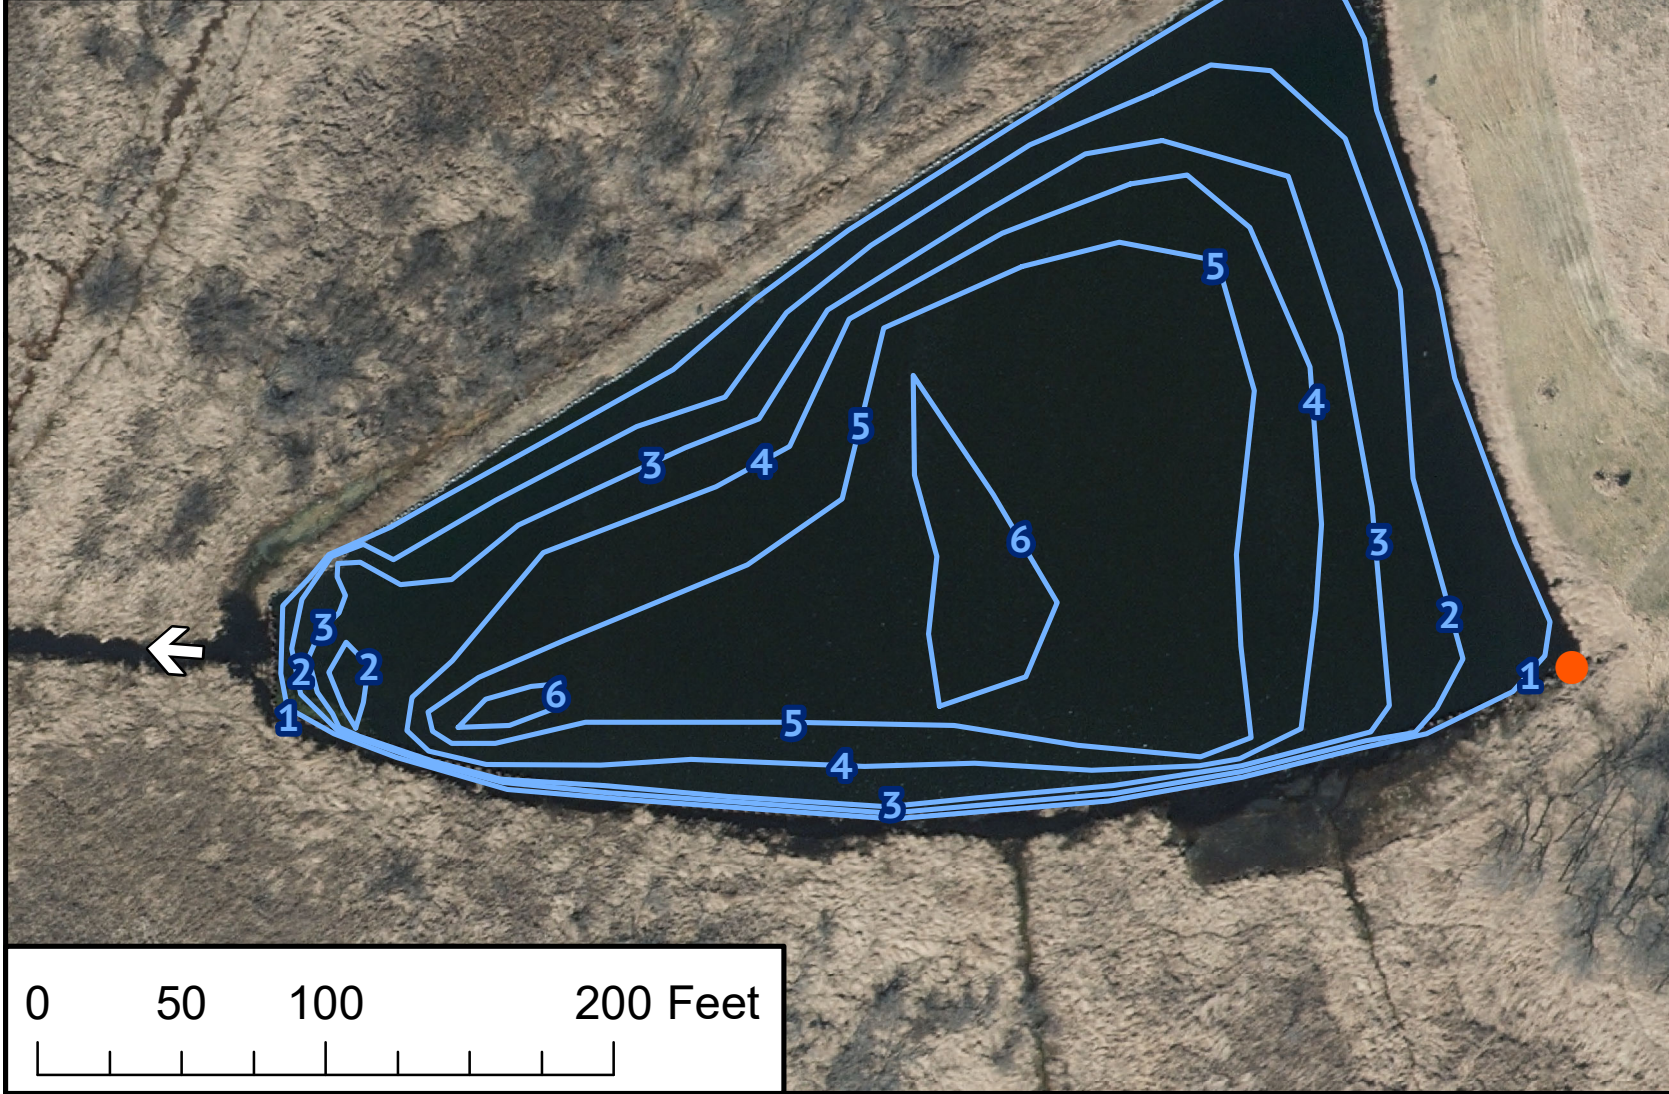

**Discussion and direction from the Board to proceed on one or both maintenance efforts, dredging the pond and/or developing a management plan for AIS in Lambert Lake.**

Re: V. B. 1. Education and Outreach update  
V. B. 2. December Water Matters content – direction

### **V. B. 1: Education and Outreach Update**

Fall activities in the E/O department have been continuing existing efforts and building new outreach capacity. Highlights include:

- Hosting a turf management workshop with MS4 communities
- The Master Water Stewards opening night, which started the next cohort. VLAWMO's two new master water stewards were present. One additional steward is sponsored by Ramsey Washington Watershed to our south, but lives in VLAWMO. We've agreed between the watersheds that his volunteer time can be divided between the two organizations.
- The opening event for the Community Blue Grant "Connect the Drops" was a success. On Sept 30<sup>th</sup> Heidi from Growing Green Hearts gathered and trained 6 leaders from 3 Church congregations in VLAWMO. Three additional congregations are involved peripherally.
- Picture Posts are installed and actively being used to for citizen monitoring on Pleasant Lake in North Oaks. VLAWMO is also re-kindling our volunteer Aquatic Invasive Species program – the picture post outreach made a great platform for extending the topic to AIS.
- Two community-led storm drain clean-up events are occurring in Vadnais Heights this Fall.

### **V. B. 2: Water Matters Direction**

As per the Education Outreach Plan's goal to have TEC and BOD members participate in watershed education activities, staff would like to gauge Board interest for upcoming Water Matters info-sessions.

- Playing the Watershed Game: More than just a game, this is an activity that counts toward MS4 reporting on the annual SWPPP. The game has had recent updates, so re-familiarizing ourselves with the game can help to keep it active in the watershed. A core of City staff and officials who support the game will help time be designated in each community.
- Guest speakers:
  - Brooke Asleson from the MPCA, chloride specialist
  - MN State Climatologist(s): Hear about MN's rainfall patterns and climate trends, which may inform discussion on floodplain areas on Lambert Creek

Re: VI. A. Goose Lake

1. **Overview of management efforts** on this highly impaired water resource. VLAWMO has several efforts underway, most of which you are aware of, to address this lake which was identified as a priority on our Water Management Plan. Roughly, they can be divided into two categories, in-lake and drainage or subwatershed area efforts.
  - a. As you know, VLAWMO received a grant to do **work in the subwatershed**. The first part is a feasibility study including hydraulic modeling and design for three best management practices. The report should be available by mid-winter with the highlights of the watershed modeling and the list of possible BMP's that could reduce nutrient loading into the lake. One of the designs will be chosen for installation later in next year or possibly into 2020. The other two projects will be ready to put in our water plan amendment for use at a later time. Staff has requested Barr consider restoring and enhancing the Polar channel as one of the three design scenarios. Doing an in-pond alum treatment of Oak Knoll pond would be another. Barr Eng. has applied for a research grant to try Spent lime in urban ponds. One would be Oak Knoll pond so VLAWMO would partner by assisting with monitoring efforts. Another pond would be in Ramsey Washington Metro WD. We'll hear by December if that grant is secured.
  - b. The **Alum treatment grant application** award information will be available in December. At the Stakeholder meeting in July the idea of addressing how the alum treatment would affect the vegetation in the lake. Our new staff Dawn Tanner, has been working on what would be involved managing the vegetation in Goose Lake including working with the DNR.
2. **Vegetation Management Plan**. MN DNR is the primary entity responsible for development of a Lake Vegetation Management Plan (LVMP). They would build a LVMP for Goose Lake with VLAWMO as a cooperator.
  - a. The first step toward a LVMP is a formal request. The request includes previous information about lake monitoring (e.g., TP and Chlorophyll-a concentrations, Secchi readings, and plant survey data) and prior chemical and mechanical treatment for AIS. It also includes our history of AIS, the BARR feasibility study, prior efforts (rough fish removal), and planned actions for stakeholder involvement/communication about chemical treatment if a variance is needed. Our request is submitted. MN DNR will likely take ~6 weeks to evaluate and decide how to proceed.
  - b. **Two issues:** 1) Whether they will accept the 2014 plant surveys for their survey needs (This was identified as a need in the BARR final report in August) and 2) if they will work

with us proactively. MN DNR usually does not work on the LVMP process until there is a documented need. They would like to have our request on file and continue to communicate with us as we conduct the alum treatment.

- 3. Watershed based funding Grant Agreement for Goose Lake – Resolution 08-2018.** Please find both the grant agreement with the State and the Resolution authorizing the execution of the grant attached for your review.

Recommendation: The approval of Resolution 08-2018 executing the grant agreement.

- 13. Termination.**
  - 13.1. The State may cancel this Grant Agreement at any time, with or without cause, upon 30 days' written notice to the Grantee. Upon termination, the Grantee will be entitled to payment, determined on a pro rata basis, for services satisfactorily performed.
  - 13.2. In the event of a lawsuit, an appropriation from a Clean Water Fund is canceled to the extent that a court determines that the appropriation unconstitutionally substitutes for a traditional source of funding.
  - 13.3. The State may immediately terminate this grant contract if the State finds that there has been a failure to comply with the provisions of this grant contract, that reasonable progress has not been made or that the purposes for which the funds were granted have not been or will not be fulfilled. These identification numbers may be used in the enforcement of federal and State tax laws which could result in action requiring the Grantee to file State tax returns and pay delinquent State tax liabilities, if any.

Re: **VI. A** Storm Sewer Utility Certification to Ramsey and Anoka Counties

This is the final step in our annual process to complete the Storm Sewer Utility for 2019. The Budget with its anticipated income from the SSU was set in June that drove the rates for residential and non-residential properties which were approved in August. Staff has been working with our SSU consultant and the counties to review property divisions and other updates since then. The charges to each non-exempt parcel are now ready to be certified as we do each October.

Please note the Parcel lists for each county will be sent electronically only as they are lengthy. The Resolution for Certification is included in the packet.

**Re:** VI. B. Birch Lake Project – 4<sup>th</sup> St & Otter Update; MNCC Grant Application

1. The 4<sup>th</sup> St. & Otter Lake Rd storm water treatment project is still progressing and moving forward. After some conditions witnessed this past monitoring season and in light of the approved wetland delineation performed on the site, staff and the engineer have been working on parameters to move the placement of the treatment filter from the outlet to the inlet of the area. As concept plans first showed, it was projected the filter would be placed on the outlet to clean the stormwater that exits the wetland before going into Birch Lake. It has now been determined that placement would instead be ideal at the inlet of the wetland, the storm water would run through the filter, be treated, and then go directly to the improved outlet and out into Birch Lake. As it is now, the inlet puts water directly into the wetland, which, in turn, pushes all of the nutrients out of the wetland and carries them into Birch Lake when the water leaves the system. Effectively, re-placement of the filter would completely prevent that from happening.
  - a. We are waiting for one more survey collection to be done and then that will be relayed to Barr Eng. for them to move further with engineering design options for the filter.
  - b. Staff also had the chance to meet with the City of White Bear Lake staff to catch up on project development, and it was determined that the City will seek to directly own the 4<sup>th</sup> & Otter property that VLAWMO was seeking to acquire.
2. MN Conservation Corps grant application. The MCC grant window is now open (Oct. 15-Dec. 15). VLAWMO is preparing a proposal to support work onsite for the filter and restoration to support enhanced function of the filter. We are proposing to use a MCC crew for 8, 10-hour workdays in two chunks of time. We'll do one set of time to clear buckthorn and other brush, remove debris from the site, and treat the site with herbicide. There will be a minimum of 5 days between herbicide application and replanting target vegetation. Revegetation will focus on native grassland species with a few low-growing shrubs. These plantings will reduce leaves and other plant debris delivered to the filter. The project will save time and money in filter maintenance and likely extend the functioning time of the filter. The dollar value for this grant depends upon the actual time spent and size of the crew but is approximately \$10,000.
