

Smart Salting Training

FOR PROPERTY MANAGERS

About the Workshop

This workshop teaches property managers how to deal with winter maintenance troubles through presentations and class exercises. Participants will learn how to reduce indoor and outdoor damage caused by salt, how to ensure maintenance crews are using sustainable practices, dealing with liability, and other winter maintenance headaches. *An optional test is offered to earn the MPCA Level 1 Smart Salting certification which is valid for three years.*

Topics

Winter maintenance basics, infrastructure and environmental effects, legal considerations, tenant education, success stories, and discussions with other industry professionals.
