

MPCA Smart Salting for Property Management

December 14th
9-1:30 pm

What:

A training workshop to learn about the impact of salt on infrastructure and water resources, and to work as a team to reduce chloride pollution. Voluntary certification available.

Who:

Management-level property managers
Business owners and HOA staff/board
MS4 Permit staff, public works directors

What you'll learn:

- Improve practices to save money
- Reduce annual landscaping and infrastructure damage
- Discuss liability and regulatory issues
- Reduce complains and hear success stories
- Funding and educational resources for staff or customers

Why get smart salting certified?

Annual property damage from salt use is high. Uncover ways to use less salt on your property while providing a high level of safety by getting Smart Salting certified. This training is being offered to reduce the amount of salt polluting our lakes, rivers, and groundwater, and will also provide strategies save your organization money.

*"Just 1 tsp of salt permanently pollutes
5 gallons of water."*

Intro video

Check out the [MPCA Smart Salting for Property Managers](#) video (2:21) for more on what the workshop entails and why the issue of chloride pollution needs a team effort.
